Why SoundCloud?

We decided to look into SoundCloud's pain points for a few reasons. The first of all, we wanted to see if the problems we identified in our research, which we found to be very common among our peers, are also present in the real world and experience is lacking in many ways as we have suspected.

Secondly, we wanted to see how well SoundCloud addresses these pain points and what are the ways in which they could improve and grow. Throughout the last few years, the company has been struggling to keep its head above water and to stay current between and to find a sustainable business model.

We decided to conduct interviews and user tests with people who are in the same demographic as our target audience, to see if the issues we identified applies to a sample of SoundCloud users. We conducted 5 in-depth interviews and user tests should give us reliable results, as we have seen that the results we have received from our earlier research, have been consistent across participants. We also conducted a survey aiming at open ended thoughts and feelings about the platform and what people like and dislike about it, to see if our hypothesis and assumptions are correct.
